When will Italy's first energy storage capacity procurement mechanism be postponed? Italian transmission system operator (TSO) Terna said that Italy's first energy storage capacity procurement mechanism (MACSE) will be postponed until September 2025. Italian TSO Terna has decided to postpone its first auction for the procurement of energy storage capacity until later this year.

What will Trina storage do with the remaining capacity? The remaining capacity will be used for energy arbitrage. Gabriele Buccini, head of utility storage at Trina Storage said: 'Commissioning our first utility storage system in Italy is a significant milestone for Trina Storage and the wider Trinasolar group.'

How much energy does Italy need online? Italy has relatively little grid-scale energy storage online but that number is expected to soar in the next few years, with Terna estimating it ultimately needs 71 GWh online by 2030 to integrate its renewables pipeline (Premium access article).

Why is Italy a key market for European energy? This demonstrates European Energy's ability to develop projects which are attractive for the leading investors in the Italian renewable energy market, says Alessandro Migliorini, Director and Country Manager of Italy at European Energy. 'Italy is and will continue to be a key market for European Energy's global development.'

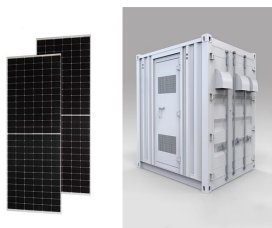

Is Italy the hottest battery market in Europe? Italy has established itself as one of Europe's hottest battery markets. The country placed top among 28 European battery storage markets recently surveyed by Aurora Energy Research, driven by its 50 GWh battery capacity target by 2030 and the opening of its ancillary markets to BESS.
