Sustainable Energy for All ??? Equatorial Guinea Part 1. SITUATION ANALYSIS 1. CONTEXT AND GLOBAL SIGNIFICANCE: ENVIRONMENTAL, POLICY AND INSTITUTIONAL Equatorial Guinea Equatorial Guinea a small country located in West Central Africa, with an area of 28,000 km² and a population of around 720,000.

For Equatorial Guinea, which enjoys a strategic position in the Gulf of Guinea, gas-to-power offers the potential to anchor the development of a regional power economy. Given its current energy output and relatively small population of 1.4 million, the country has been able to meet domestic energy demand with self-produced power to date.

Hollandia was a port on the north coast of New Guinea, part of the Dutch East Indies, and was the only anchorage between Wewak to the east, and Geelvink Bay to the west. It was occupied by the Japanese during their invasion of the Dutch East Indies in 1942, who planned to use it as a base for their expansion towards the Australian mandated territories of Papua and New Guinea.

Djiploho Hydropower Plant is a 120MW hydro power project. It is located on wele river/basin in Wele-Nzas, Equatorial Guinea. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in a single phase.

Equatorial Guinea, located on the west coast of Central Africa, has a diverse geographical layout with coastal plains rising to interior hills and plateaus. This spread-out geography and a relatively small population of around 1.6 million people can present challenges for technology and telecommunications infrastructure. Its population is unevenly distributed, with a significant ???
