

HOME BACKUP BATTERY SOUTH AFRICA

What is a home backup battery? A home backup battery provides a safety net when you need to protect your family against a power loss. It delivers clean power, unlike a home standby generator that relies on fossil fuels. With battery backup solutions, you get energy security and peace of mind.

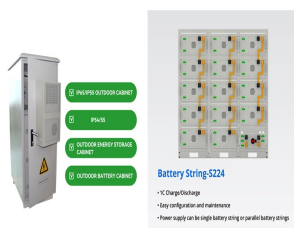

Why do you need a power backup system in South Africa? Load shedding in South Africa has become a reality and it's imperative to keep your life functioning during these times. Having a power backup solution means that you can continue to work and play during these times when most South Africans feel frustrated. We supply power backup systems that are portable or fully integrated into your DB board.

What is battery backup power? Battery backup power provides temporary power during load shedding or an unplanned electrical outage. It can be used in homes, offices, and other buildings to keep essential equipment operating when the main power supply from Eskom is cut off.

Where can a battery system be used in South Africa? For example shops, doctors rooms, and rented offices. The modular nature of the system allows you to select more batteries at a later stage. The system can also be permanently integrated into your electrical distribution board by a competent electrician. Prices quoted include delivery anywhere in South Africa.

Do you need a backup battery for your home? A backup battery solution for your home is one of the most efficient ways to keep the lights on when a blackout comes. A home backup battery provides a safety net when you need to protect your family against a power loss. It delivers clean power, unlike a home standby generator that relies on fossil fuels.
