

# HOW LONG DOES IT TAKE TO GET BACK THE MONEY FROM ELECTRICITY STORAGE

How long does it take to pay back a solar system? It can take between 4 and 8 years on average to pay back the cost of your solar system. There's reports that solar payback periods could go down with energy prices predicted to go up in the next 2 years. We spoke with an expert to discuss these claims.

How long does it take to recover solar energy costs? On average, it can take between 4 to 6 years to recover costs. However, with energy prices predicted to go up by 50% over the next 2 years, your payback period could likely shorten. Not keen on rough numbers? You can add in your details in the solar power payback calculator for a more precise estimate.

How long does a solar energy payback last? Palz and Zibetta also calculated an energy payback of about 2 years for current multicrystalline-silicon PV. For single-crystal silicon, which Alsema did not calculate, Kato calculated a payback of 3 years when he did not charge for off-grade feedstock.

How much is saved by using stored energy in a battery? Yet most of this saving will come from the solar panels. Only around \$130 a year is saved by using stored energy in your battery. According to The Eco Experts, a typical three-bedroom home could save around \$582 every year with a solar battery AND solar panel system.

How much money can you get back on solar panels? The federal residential clean energy credit, for example, gives you up to 30% back. Your state might also have additional incentives. Those credits can lop off a significant chunk of the money you pay for solar panels, making your payback period shorter.
