

HOW TO CONNECT THE MOBILE ENERGY STORAGE POWER SPEAKER

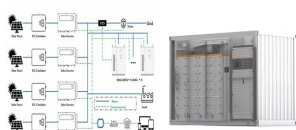

How do I set up energy speakers? The recommended setting for the front, rear and center speakers is the **small** position. The Subwoofer must be activated by setting the **on** or **use** settings. Set the crossover frequency (if possible) to 100Hz -120Hz. All ENERGY Speakers are designed to operate on a wide range of receivers and/or amplifiers.

How do I connect my energy(R) take classic speakers? On the rear of your ENERGY(R) Take Classic speakers are red and black 5-way binding posts. Using standard speaker wire, connect the system one channel at a time, and start your process at the Receiver. Connect the speaker wire from the positive (RED+) terminal on the receiver to the positive (RED+) terminal on the speaker.

What are energy(R) speakers? ENERGY(R) speakers are the result of extensive research into accurate sonic reproduction and represent the leading edge in speaker design and performance. The finest components and cabinet materials combined with sophisticated manufacturing and quality control procedures ensure many years of exceptional performance and listening pleasure.

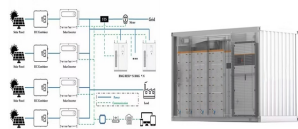

Who is responsible for shipping energy(R) speakers? You will be responsible for transporting the speakers in adequate packaging to protect them from damage in transit and for the shipping costs to an authorized ENERGY(R) Speaker Systems service center or to ENERGY(R) Speaker Systems.

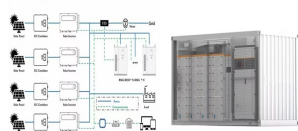

How do I set up my energy(R) subwoofer? Plug your ENERGY(R) subwoofer into an AC outlet. Do not use the AC outlet on the rear of your receiver. See Final System Adjustments, below. The recommended setting for the front, rear and center speakers is the **small** position. The Subwoofer must be activated by setting the **on** or **use** settings.

HOW TO CONNECT THE MOBILE ENERGY STORAGE POWER SPEAKER

Do Energy speakers work on amplifiers? All ENERGY Speakers are designed to operate on a wide range of receivers and/or amplifiers. The impedance for all models is rated at 8 ohms, allowing almost any amplifier to function well. Of course, the better the amplifier and the system components, the better the overall system will sound.
