A TV lift stand, or TV lifting system, is a mechanical system powered by electricity and used to move a television set vertically or horizontally out of (and into) ceilings, partition walls, or furniture such as retractable TV cabinets. The advantages of implementing this mechanised system lies in its ability to optimise one's space, protect the device from potential harm such as from dust

You can also use an RF remote control system that allows you to keep your TV electronics in another room -- I'll add a link to that at the end of the post. We didn't want to use that because we use the voice controls often.
