

# ICO ENERGY LEBANON

How can we improve electricity in Lebanon? Electricity in Lebanon is highly subsidised. Therefore, increasing tariffs and reducing electricity subsidies may encourage public and private investments in renewable energy projects and allow for the proliferation of renewables through small- and medium-scale deployment. Reinforce the grid and conduct grid impact assessments

Will Lebanon cover 30% of its energy consumption by 2030? Lebanon has adopted an ambitious target to cover 30% of its energy consumption from renewables by 2030.

Can Lebanon generate 30 percent of its electricity from renewable sources? Lebanon has the potential to generate up to 30 per cent of its electricity from renewable sources by 2030, according to a new report published by the International Renewable Energy Agency (IRENA).

What are the energy data based on in Lebanon? The energy data employed by this study was largely based on two reports published by the Lebanese Centre for Energy Conservation (LCEC), namely the NREAP 2016a??2020 (LCEC, 2016) and The First Energy Indicators Report of the Republic of Lebanon (LCEC, 2018). 1. Primary energy supply Lebanon relies on imports to satisfy its energy demand.

What are the benefits of renewables in Lebanon? The additional benefits of renewables are summarised in Boxes 2 and 3. The technological advancements in the areas of P2P trading and blockchain promote the implementation of community-scale renewable energy systems which, in turn, can boost the number of small-scale decentralised solar PV systems in Lebanon.

# ICO ENERGY LEBANON

Who is responsible for the energy sector in Lebanon? The Ministry of Energy and Water(MEW) is the main stakeholder in the energy sector in Lebanon. It is essentially responsible for the country's electricity, water and oil portfolios, particularly at the strategic and planning levels in these areas.
