Faux Concrete Panels: Faux Panels: Made from high-density foam or resin and finished to look like concrete, they are lighter and often more cost-effective. Concrete Look Panels: They are not made of concrete but are designed to mimic its appearance. They are often used for interior decoration as well. Functional Concrete Panels:

Our faux brick panels are manufactured using cheaper materials and are straightforward to install, ensuring a convenient and cost-effective solution to traditional brickwork. They provide a superior insulation performance than brick veneer and the insulation matches real brick in most cases. A typical R-value of faux brickwork is 5.

Our faux panels are crafted from natural brick used in the 1920s and feature a unique hand-painted finish that adds depth and character to each brick. These faux reclaimed brick panels are made from high-density polyurethane and perfect for interior and exterior use. They are lightweight, durable, and easy to install without compromising structural integrity.
