Will Indonesia add more solar power by 2033? According to IESR, Indonesia's state electricity company, PLN, plans to increase renewable energy generation by adding 7.9 GW of solar capacity by 2033. Additionally, policy changes from the Ministry of Energy and Mineral Resources are expected to add over 5 GW of rooftop solar capacity within five years.

Can solar power improve Indonesia's energy security? Indonesia Solar Energy Outlook 2025 highlights the crucial role of solar power in improving Indonesia's energy security. The report analyzes how solar PV can help reduce dependence on fossil energy, improve the reliability of electricity supply, and address the challenges of climate change.

What is Indonesia's solar energy plan? This progress is part of Indonesia's solar energy plan, which targets 5 GW of installed capacity by 2030. The growth of solar power in Indonesia reflects not just a commitment to shift away from its fossil fuel-dominated energy system but also recognises the immense potential the solar energy holds in the Indonesian archipelago.

What is Indonesia's solar energy capacity? The capacity of solar energy in Indonesia is steadily climbing. With total capacity reaching over 322.6 MW as of the first half of 2023, this is an increase of over 800% in the last 10 years. This progress is part of Indonesia's solar energy plan, which targets 5 GW of installed capacity by 2030.

Does Indonesia have solar PV? Solar PV has not scaled as fast in Indonesia as in some of its regional peers. In 2022, the country had 0.3 GW of installed capacity, low compared to the 3.1 GW and 18.5 GW of Thailand and Vietnam, respectively (Exhibit 2).

Indonesia & Floating Solar. Indonesia is undergoing rapid development, marked by increased living standards and population growth. Projections suggest a 30-fold surge in electricity demand, reaching 9,000 Terawatt-hours annually by 2050 [6]. The Equatorial region's specific climatic conditions, featuring relative calmness in some areas, make

The report indicates that as of August 2024, there are 16.92 GW of announced solar projects in preparation nationwide, with an anticipated addition of 350 GW to 550 GW of solar capacity by 2050. It also noted that Indonesia's solar-related investments nearly doubled, increasing from \$68 million in 2021 to approximately \$135 million in 2023.

2 ? The amount of solar energy installed in the EU had jumped by more than 40% year-on-year in both 2021 and 2022, and by more than 50% in 2023, industry association SolarPower Europe said.
