

INSOL ENERGY THE NETHERLANDS

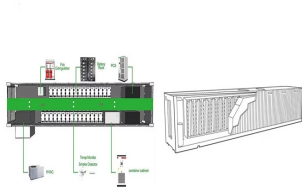

Is the Netherlands saying 'doei to coal'? Since biomass energy production is often the product of co-firing in coal-powered plants, its decline actually reflects a positive trend ??? the Netherlands is saying doei to coal! With the solar and wind energy industries increasing their capacity and their productivity, renewable sources are becoming cheaper than coal.

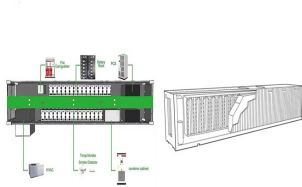

Why is the Netherlands important to the European solar industry? Important because the EU is heavily committed to greater energy independence by increasing competitiveness in net-zero technology. By taking concrete action now, the Netherlands can be at the forefront of the European solar industry, which will provide a crucial economic and strategic advantage on the long term.

Are fossil fuels a thing of the past in the Netherlands? As a result, this year, energy produced using coal fell by almost 40% compared to the first half of 2023. Natural gas, however, still makes up 35% of the total Dutch energy production ??? meaning that fossil fuels are not yet a thing of the past.

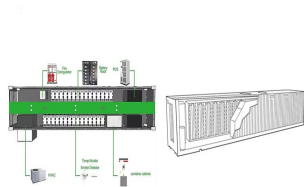

What is the main source of electricity in the Netherlands? Hoera! For the first time ever, renewable energy is the main source of electricity in the Netherlands Goed nieuws! In the first half of 2024, more than half of the electricity produced in the Netherlands came from renewable sources instead of fossil fuels ??? this has never happened before.

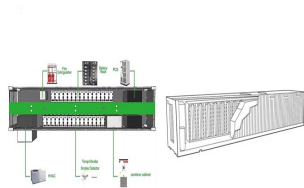

Can the Netherlands produce more solar energy than last year? This improvement allowed the Netherlands to produce more solar energy than last year despite the sun shining less often compared to the first half of 2023. After all, if the Dutch have one talent, it's soaking up every last ray of sunshine ??? and transforming it into electricity, apparently!

INSOL ENERGY THE NETHERLANDS

What does a consortium of Dutch solar companies do? A large consortium of Dutch solar companies aims a leading position in the solar industry in Europe. The companies joint forces in SolarNL. The aim is to build several plants in a few years, building on ambitious innovation programmes. In doing so, the companies are working closely with research organisations.

In the Netherlands, 1,000 km² of solar technology must be installed by the year 2050, and that is not possible with conventional rigid glass panels. TNO is conducting research in the reliability, efficiency, costs and producing mass ???

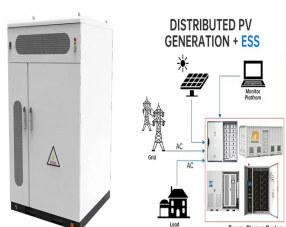

From increasing taxes to new policies, this is how energy prices in the Netherlands are changing next year. The Netherlands is getting rid of the price ceiling. At the start of 2023, the Dutch government introduced a price ceiling for gas and electricity meant to protect households from price fluctuations, reports the NOS.

Fixed energy contract: You agree on a fixed rate. For the duration of the contract, this is the price you pay for energy, regardless of market price changes. If you want to cancel early, you will incur a switching penalty. Variable contract: The energy rates depend on the market price and change monthly. You never pay too much, but you have

INSOL ENERGY THE NETHERLANDS

On the road to a carbon-neutral energy system in 2035, ambitious targets are set by the Dutch government for both energy production (3GW offshore solar and 21GW of offshore wind by 2030) as well as energy carriers such as hydrogen (4GW by 2030). Perhaps even more ambitious are the underlying policy frameworks.

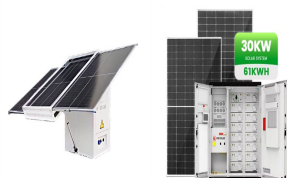

In the Netherlands, if you have solar panels, and you generate more energy than you use, you can sell that electricity to your energy provider. However, some companies are now charging money for people with solar ???

Karin Sixma and Dulijon Veldhoen have contributed the Netherlands chapter for INSOL's publication Pensions & Insolvency - an International Survey. They discuss, among other topics, the Dutch legal framework for private pension plans, supervising authorities, and enforcement of pension rights in case of an insolvency of the employer.

By 2050, the Netherlands wants to be using energy from sustainable sources only. There's a long way to go before this can happen. It will require new wind farms, electricity pylons, cables and other infrastructure. People, businesses and organisations will need to switch to smarter and more efficient ways of using energy.

INSOL International is a world-wide federation of national associations for accountants and lawyers who specialise in turnaround and insolvency. so those taking the course must dedicate the time and energy needed to get the most out of the opportunity. Many sessions are interactive and each requires the full attention of the participants

Understanding the energy market in the Netherlands. The first step is to get an idea of how the energy market in the Netherlands is set up. So let's talk about the Dutch energy market in general at first. It's liberalized, which means you can choose the energy companies for gas and electricity yourself.
