

# IS THERE A DIRECT SHIPPING LINE TO EUROPE FOR ENERGY STORAGE BATTERIES

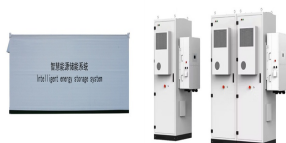

Can I ship a lithium battery internationally? Lithium batteries are classified as Dangerous Goods and not all types are accepted by DHL Express. There are regulations attached to the cross-border shipping of batteries, including lithium batteries, to ensure they travel safely. These regulations vary depending on the type of batteries.

Can you ship a battery within a country? While there are regulations for cross-border shipping of batteries, you can generally ship batteries within a country. Many electronic products and devices contain batteries, especially lithium batteries found in laptops, smartphones, tablets, medical devices, and power tools.

How do I ship a lithium ion battery? When shipping lithium ion batteries, ensure the outer box has the UN number (UN 3480), proper shipping name (Lithium-ion batteries), and hazard labels. Use laminated labels and avoid placing battery shipping labels on removable packaging.

What are the shipping requirements for lithium batteries? These regulations include proper packaging, labelling, and documentation to ensure safe and secure transportation. Some general shipping requirements to transport lithium batteries internationally include: Lithium batteries weighing over 35kg must be approved by the national authority of the shipping and destination country before shipment.

How many lithium batteries can be shipped? Only a maximum of four can be sent, with two per container, and each battery must have a rating of below 100 watts per hour. It is essential to note that some countries have their own regulations and restrictions for shipping lithium batteries, so it is crucial to check with the destination country's customs authorities before shipping.
