

ISLE OF MAN ELECTRICITY BATTERY

How much electricity does the Isle of Man need? Therefore, the Isle of Man currently requires (as a minimum) a generation asset with capacity up to 30MW for use during peak-demand to produce an estimated 15.3 GWh per year. Therefore, 15.3 GWh would be required from domestic generation, which would represent 3.5% of current electrical generation and reducing total CO2e emissions by c.23%.

Why did Manx Utilities partner with EVOLT charging? As part of its ongoing commitment to future-proof the Island's EV infrastructure and make it easier and quicker than ever before for drivers to charge their vehicles, Manx Utilities has partnered with Evolt Charging to manage and expand the network. It follows the withdrawal of the current supplier, Pod-Point, from the public charging market.

Does the Isle of Man have an AC interconnector? There is an AC Interconnector (AC I-C) connecting the Isle of Man to the UK. With an undersea section of 104 km, it is the longest AC cable in the world. It was laid in 1999 between Bispham (UK) and Douglas (IOM) and commercial operations commenced in November 2000. It was initially capable of continuous operation of 40 MW at 90 kV.
