What are Italy's energy goals? Italy's ambitious energy goals, outlined in the National Integrated Energy and Climate Plan (PNIEC), mark a transformative shift toward renewable energy. By 2030, the country is targeting 28GW of wind power and nearly 80GW of solar capacity, making energy storage essential for ensuring grid stability and maximizing renewable integration.

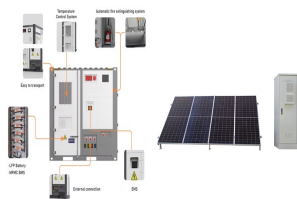

Are our storage systems compatible with all photovoltaic systems? Our storage systems are compatible with all new or existing photovoltaic systems also in "Conto Energia". The cabinet manufactured by us for all types of system allows the increase of storage capacity over time by inserting 19" rack modules. Our storage systems are fully integrated and have reduced dimensions and weights.

What is energy storage? ECONOMIC Behind a simple and elegant design the storage systems "all in one" Energy Storage hide a cutting-edge technology: they are able to accumulate energy instantly during the day and return it automatically with great efficiency by day, evening, night or when needed, thanks to lithium or accumulator batteries.

How many GWh of energy storage is needed in 2025? To maintain grid stability, TERNA forecasts the need for 71GWh of storage, equivalent to about 20GW of capacity by 2030. The second edition of RENMAD Storage Italia (April 2-3, 2025) will bring together leading experts and industry leaders to discuss the evolving energy storage landscape, exploring both the opportunities and challenges ahead.

In 2023, residential energy storage continued to dominate Italy's energy storage landscape, representing the largest application scenario for newly added installations. Residential PV systems retained their prominence, ???
