Abstract: In order to study the mechanica properties of the fixed photovoltaic bracket and its failure under wind load, the full-scale photovoltaic bracket specimen was designed and the destructive test was carried out by means of static loading. Through simulation and mechanical analysis, the design suggestions for the fixed photovoltaic support are given.

This artwork by Liang Yuanwei achieved an unexpectedly high price at Sothebys in Hong Kong in April 2018. In the Contemporary Art Day Sale auction, the work Piece Of Life sold for HKD 2,125,000.00 (a?! 224,221.47) - well above the upper estimate of HKD 800,000.00. Admittedly, works by Liang Yuanwei have also been auctioned for a multiple of this price - a?|

Yuanwei Liu's 8 research works with 420 citations and 3,172 reads, including: A comprehensive study of feasibility and applicability of building integrated photovoltaic (BIPV) systems

Liang Yuanwei graduated with a BA and an MA from the China Central Academy of Fine Art. She lives and works in Beijing. The rigorous oil paintings from her 2008 Pieces of Life& nbsp;series were inspired by fabrics and prints from her own clothing. Her thickly painted surfaces suggest textures and patterns, focusing on the meticulous process of their production. As a member of a?

Behind the Curtain reveals Chinese artist Liang Yuanwei's process-based approach to art making. Her earlier works bear the mark of conceptual art. Her practice has slowly evolved over the years, imbued with her recent research on Chinese and Western traditions. The exhibition titles in English and Italian both allude to the revelation of what

Her solo exhibitions include One Obejct (Hunan Museum, 2019), Behind the Curtain (Palazzo Pisani-Conservatorio de Musica, Venice, 2017), Oval (Xi"an OCAT,2015), The Tension between a Bow and an Elephant (Pace London, a?

Photovoltaic flexible bracket is an emerging photovoltaic installation system, which is characterized by its flexibility and adaptability. Compared with traditional fixed photovoltaic brackets, flexible photovoltaic brackets can be flexibly adjusted according to terrain, lighting conditions, seasonal changes and other factors to maximize the power generation efficiency of a?

Liang Yuanwei became known for richly textured impasto paintings, produced in an unusual technique that the self-taught painter invented. Her early canvases simulated patterned cloth a?? checked, striped, or intricately flowered like traditional quilts. She collected fabric remnants from friends and relatives, some with a personal significance

Liang Yuanwei's 2008 series of paintings "A Piece of Life" compiled works produced over a long span of time. The canvases seemed more like silk and satin, their graphics like decorative, geometric designs, practiced experiments. The exhibition contained more than thirty works, with the strokes, color, and compositions all distinct.

Behind the Curtain unveils the secret and intimate nature of Liang Yuanwei's work. It is also a tribute to Venice, to the mythical opera house Teatro La Fenice, and to the Carnival of Venice, during which crowds of revellers hiding behind their masks roam alleys and canals of the city. The Chinese title is a direct borrowing from the name of

Liang Yuanwei acknowledges a number of artists who have been significant to her work as she taught herself to paint, including sculptor Eva Hesse and painters Luc Tuymans, Sigmar Polke and Gerhard Richter. Some of her teachers at the Central Academy of Fine Arts returned to China from Berlin in 1995, bringing with them new ideas about art, and

The installation selection of photovoltaic ground brackets is mainly based on factors such as the fixing method of the bracket, terrain requirements, material selection, and the weather resistance, strength, and stiffness of the bracket. First, there are many fixing methods, such as pile foundation method (direct burial method), concrete block weight method, pre-embedded method, ground a?
