AZE's heavy duty outdoor battery enclosures and Lithium battery storage system are available in NEMA 3R, or 4X configurations. These outdoor battery enclosures, which come in all shapes and sizes, are designed to withstand extreme elements, climates and environments.

All batteries gradually self-discharge even when in storage. A Lithium Ion battery will self-discharge 5% in the first 24 hours after being charged and then 1-2% per month. If the battery is fitted with a safety circuit (and most are) this will contribute to a further 3% self-discharge per month.

Temperature is a critical aspect of lithium battery storage. These batteries are sensitive to extreme conditions, both hot and cold. The ideal temperature range for lithium battery storage is 20°C to 25°C (68°F to 77°F). This temperature range helps to maintain the battery's chemical stability and avoids rapid aging.
