

MACAO INSPIRED ENERGY

Why is Macao a net importer of embodied emissions? The economic scale effect and energy structure change were identified as the main driving factors of Macao's increasing energy-related emissions, while trade structure and embodied emission intensity contributed to make Macao a net importer of embodied emissions. However, some variations can be seen during the period concerned.

What is the main energy source in Macao? Fuel oil, which was utilized for electricity generation, was the dominator of Macao's energy consumption in early years. To optimize the energy structure, natural gas, a less pollution-intensive energy resource, has been introduced to take the place of fuel oil since 2008.

What is energy in Macau? Energy in Macau is related to all of the type of energy and its related infrastructure used in Macau, China. Energy-related affairs is administered under the Secretariat for Transport and Public Works of the Government of Macau. Macau imports its natural gas supply from Hengqin Island in Zhuhai, Guangdong.

Why is energy supply a key issue in Macao? In order to ease the contradiction between scarce energy resources and growing demand, Macao has imported nearly all of its fuel energy and more than 90% of its electricity now, making energy supply a key issue in Macao considering the commodity export policy and price.

How can Macau improve energy consumption? Energy consumption improvement activities by various users. Because of Macau's tropical climate, the largest energy consumption for buildings is from air conditioning systems, and consequently the average air-conditioner temperature settings is the key measure for reducing electricity use.

MACAO INSPIRED ENERGY

Why does Macao import electricity from China? To satisfy Macao's ever-increasing electricity demand, Macao has imported increasing electricity from mainland China. In 2011, more than 75% of total electricity consumption and two fifths of total energy consumption in Macao are supported by imported electricity .
