

MADAGASCAR ENERGY STORAGE CUSTOMERS

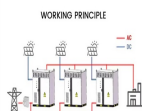

Why does Madagascar need a stable energy network? This leaves the country with the difficult task of creating a stable, pervasive energy network in order to supply the majority of the population with electricity. Only about 15% of Madagascar's population has access to electricity and only 10% are internet users.

What will esogip do for Madagascar? The ESOGIP will aid Madagascar's government to decrease energy loss, increase energy efficiency, raise the ratio of renewables in the domestic energy mix, develop its governance of the energy sector, and improve operational performance of Jirama, Madagascar's state-owned electric utility and water services company.

Does Madagascar need a hydroelectric power plant? Much of Madagascar's renewable electricity supply is sourced from hydroelectric plants, which require substantial improvement in capacity potential. Developing and expanding the network of small hydroelectric power plants in particular is an opportunity that the energy sector must further explore.

Integrating energy storage can make new or existing solar energy projects more valuable, providing the ability to use that clean, low-cost power at times when it is most valuable. Learn more about the value of storage, the ???

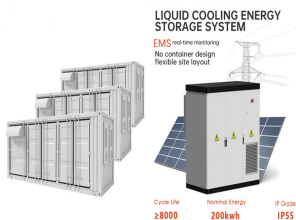

Comprising a solar power plant, an energy storage system and a distribution line and meter for each customer, a mini-grid can provide electricity 24/7. The 120 additional villages in 17 ???
