Product Introduction. Huijue Group's new generation of liquid-cooled energy storage container system is equipped with 280Ah lithium iron phosphate battery and integrates industry-leading design concepts. This product takes the advantages of intelligent liquid cooling, higher efficiency, safety and reliability, and smart operation and maintenance to provide customers with efficient ???

HJ-EOV series battery packs are high-voltage stacked all in one energy storage systems, designed entirely for residential ESS applications. With this product's integrated battery and inverter, you can reduce your adaptation worries, easily save on electricity bills and back up your power in case of grid outage or unavailability.

The HJ-SPW residential wind and solar energy storage integrated system is a combination of equipment and technology that converts wind and solar energy into electrical energy, supplies household appliances, and stores excess electrical energy for use at n 48V, working temperature -20 ???~55 ???. 4. Equipped with a resistor unloader. Pcs: 1:

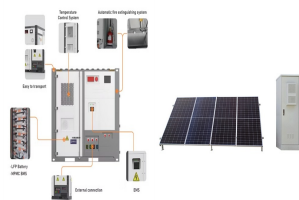

The energy storage system is connected to the AC bus (AC BUS) to improve energy utilization efficiency and balance the production and supply of the power system. Features. Based on the energy storage system, the auxiliary equipment of the station can be operated independently of the mains power to reduce the impact on the grid operation.
