Question: Can I use an off-grid inverter to fool my grid-tied inverter into producing power when the grid is down? Short Answer: You want an AC coupled solution to get power from your GTI when the grid is down. If starting from scratch, check out hybrid inverters. Long Answer: GTIs are current sources (e.g., Enphase IQ7s). These aren't like voltage sources (e.g., a UPS, ???

In theory you can add grid-tie inverters to your inverter "grid", but if your power draw ever fell below what the grid-tie panels are producing it would feed current into the inverter and it would hopefully just fault, but possibly fry. To use the micro-inverters in an off-grid setup you would need something like an EG4 or Sol-Ark HYBRID
