According to the Energy Balance for this year, electricity production from all sources will be 3,598 GWh, of which 41 GWh from solar power plants. According to the structure, 51.2% of electricity would be produced by hydropower plants, 38.55% by thermal power plants, 9.11% by wind power plants and 1.14% by solar power plants.

The project is envisaged to be implemented in phases. The start of construction is scheduled for 2025. Upon completion and commissioning, which is expected at the end of 2026, Montechevo will be the largest solar power plant in Montenegro. This year Montenegro has issued initial clearance for a solar power plant of up to 506 MW
