Outdoor portable power stations are generally compact, lightweight, and easy to transport. They operate quietly and don't produce emissions, making them environment-friendly. They can power a variety of devices and are often equipped with multiple output ports, including USB, AC, and DC, to accommodate different types of appliances or devices.

Because of the weather, I decided to try this power station at home. I want to have this power station to provide all the electricity for my hotspot meal for the whole family. I used a 100W meat slicer to sliced lamb shoulder, then powered a 1600W hot pot for about 1.5 hours. After the meal, I found there was 17% power left still. Conclusion
