

NAMIBIA UNIGRID BATTERY

Who is unigrid battery? SAN DIEGO, Dec. 19, 2023 /PRNewswire/-- UNIGRID Battery, a University of California, San Diego spin-off startup company, announces that it has received its first commercial MWh-scale purchase orders for their advanced sodium ion batteries.

What is unigrid's sodium-ion battery technology? Discover UNIGRID's sodium-ion battery technology that combines safety, performance, and sustainability. Our innovative batteries use abundant resources to deliver efficient and powerful energy storage solutions for a cleaner, safer world. Learn more and take the Sodium-Ion Challenge today!

Are unigrid sodium-ion batteries safe? Take the Sodium-Ion Challenge. For a cleaner, safer world. The world needs clean, safe, easily accessible, and affordable energy storage. We've cracked the code on a solution: UNIGRID's sodium-ion batteries, which use abundant resources, are lower-cost, safer, and just as powerful as any other battery. Why UNIGRID's sodium-ion batteries?

Are unigrid batteries safe? UNIGRID's sodium-ion batteries are unlike any other. Built in safety. For peace of mind. Third-party tested for safety, you will not find a safer sodium-ion battery with comparable performance. Our sodium-ion batteries do not undergo thermal runaway.

Will unigrid deliver advanced sodium ion batteries in 2024? Erik A. Wu, CTO of UNIGRID. Third party testing and validation on the advanced sodium ion batteries has been completed, and UNIGRID is on track to deliver MWh quantities of its advanced sodium ion batteries to customers in 2024.

NAMIBIA UNIGRID BATTERY

Are unigrid batteries a ???drop-in??? solution? UNIGRID batteries are a true ???drop-in??? solution. We use the same cylindrical and prismatic form factor as lithium-ion batteries, making a switch to our smarter, safer sodium-ion batteries seamless. Test the power of UNIGRID for yourself. Take the Sodium-Ion Challenge.

UNIGRID's unique approach, the use of a tin anode instead of hard carbon, is a breakthrough for sodium-ion batteries; it increases the volumetric energy density to be competitive with and even

UNIGRID Battery, a startup spin-off from the University of California, San Diego, announces that it has received the first commercial MWh-scale orders for its advanced tin-electrode sodium ion batteries. The company ???

UNIGRID Battery announced a successful close of an oversubscribed \$12 Million Series A funding round. The financing was Co-led by Transition VC and Ritz Venture Capital and joined by new investor Union ???

UNIGRID plans to use the Raised USD 12M for battery production acceleration. Expanding its operations, UNIGRID aims to scale up its battery production to meet MWh-scale customer orders. This strategic move ???

UNIGRID Battery, a San Diego-based startup developing advanced sodium-ion batteries, has announced a successful close of an oversubscribed \$12 Million Series A funding round. The financing was Co-led ???

NAMIBIA UNIGRID BATTERY

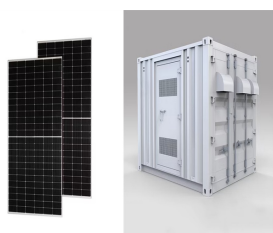

A spin-out from the University of California at San Diego, Unigrid is developing advanced sodium-ion batteries. The company said it will use the funds to accelerate and scale up its battery production to "fulfill MWh-scale ???
