Does Canada need more energy storage for net zero? Image: NRStor. Canada still needs much more storage for net zero to succeed. Energy Storage Canada's 2022 report, *Energy Storage: A Key Net Zero Pathway in Canada* indicates Canada will need a minimum of 8 to 12GW of energy storage to ensure Canada achieves its 2035 goals.

What is the Oneida energy storage project? The Oneida Energy storage project represents a significant Indigenous-led development that will create good jobs for Canadians while reducing emissions. The Government of Canada is pleased to invest \$50 million in building this project with Indigenous partners, resulting in one of the world's largest battery storage projects.

Will Alberta invest \$160 million in solar-plus-storage projects? The interest in solar-plus-storage projects is also manifested in the federal investment of over \$160 million in Alberta-based solar power projects that will deploy 163MW of new solar generation and 48MW of battery storage capacity.

What is the future of energy storage? The future of energy storage is only brighter. Research firm Acumen Research and Consulting recently projected a 9% compound annual growth rate in the Global Advanced Energy Storage System Market size from US\$19 billion in 2022 to more than US\$48.5 billion by 2032. Let's take a look at three top innovative Canadian battery stocks to buy today.

Is energy storage a viable option in Manitoba? Even the low end of the estimated potential for storage is equivalent to Manitoba's entire installed generating capacity as of 2020. Today's national installed capacity of energy storage is less than 1GW. Energy storage systems can level out supply in urban centres and capacity constrained areas, avoiding the cost of transmission system upgrades.

Why are energy storage investments so big? Mr. White says it's a different world in the United States, for example, where emissions-reductions measures from last year's Inflation Reduction Act are among the factors leading to massive energy storage investments.

Charlie Gailliot, Partner and Head of Energy Transition Private Equity Investing within Goldman Sachs Asset Management, said: "As the world continues transitioning to sustainable and renewable energy sources, the need for utility scale long-duration energy storage is clear, and Hydrostor's A-CAES solution is well positioned to become a

Concord Green Energy and the Athabasca Chipewyan First Nation, under their Concord Monarch Partnership, will each deploy a 34 MWh battery energy storage system on existing solar arrays across Alberta. The projects received a combined \$45.8 million and are expected to generate over 100 jobs.

Last year, Form Energy, a startup with a novel iron-air chemistry long-duration energy storage technology raised US\$240 million in a funding round, while gravity-based storage startup Energy Vault raised US\$100 million in a Series C funding round. Energy Vault last week added Korea Zinc to a list of investors that includes Saudi Aramco and

TC Energy investing in 400-MW Canyon Creek pumped storage project in Alberta - Hydro Review - Pumped Storage Hydro long-duration and strategically-sited energy storage is the key to unlocking the full potential of renewable energy and moving towards a lower carbon footprint in Alberta's electricity grid." ownership and operation of

Investing in energy storage doesn't just provide a pathway for reducing carbon emissions; it's also a pathway for potential savings on electricity and energy costs. By starting with a review
