Who is sinesunenergy? About SineSunEnergy Founded in 2009,SineSunEnergy has been focusing on lithium battery energy storage product development and application,providing leading lithium battery energy storage system integrated solutions.

Why is China launching a national energy storage Industry Innovation Alliance? [Photo/China News Service]China came up with a national energy storage industry innovation alliance on Monday aiming to further boost the country's energy storage sector,as the country aims to promote large-scale use of energy storage technologies at lower costs to back up the world's biggest fleet of wind and solar power plants.

What is a new-type energy storage system? The new-type energy storage systems,meaning all technologies except pumped hydro,is a flexible way of adjusting resource allocation that plays a key role in the large scale of wind and solar energy,said Li Jingru,vice-president of State Grid Economic and Technological Research Institute Co Ltd.

Why is energy storage important? While energy storage will play a key role in ensuring the steady operation of the grid,it is also faced with challenges including security issues,and the potential of its flexible adjustment has not been played to its fullest,she said.
