Cassy has managed direct and indirect direct sales including channel development throughout her sales career.

ROI has a robust portfolio of in-house technology to convert solar energy into green electricity. CSP converts solar energy first into thermal energy, then mechanical, and then into electrical a?

ROI takes in two untapped resources, solar energy, and brackish water to produce green electricity, hydrogen, and potable water. As part of our original process, we treat brackish water from either a deep formation, unusable aquifer, or seawater for either direct delivery or to prep the water to be used in hydrogen production.
