Electricity-starved Guinea Bissau will get \$48m from the International Development Association, Green Climate Fund and Esmap to catalyse solar energy generation and improve on low levels of electricity access.

In Guinea-Bissau, only 35.76% of the population has access to energy, with most of this limited resource concentrated in the capital, Bissau. Every household had one or two small solar panels for small lights, hand lanterns, speakers, and power banks. Admittedly, they mentioned that it was impossible for them to come up with new activities

The solar hybrid plant will supply electricity to the local population via a medium and low-voltage line. The entire solar and hybrid project is being financed to the tune of \$42.9 million by the Government of Guinea-Bissau with a loan from the West African Development Bank (BOAD). This financing was granted as early as 2017.

activity is in fact limited to the capital city of Bissau. On January 17, 2019 the Council of Ministers approved the revised statutes of EAGB to bring them into alignment with OHADA's Uniform Acts¹. The new statutes transformed the publicly owned company in a limited company whose only shareholder is the State of Guinea Bissau.
