

NEW YORK ENERGY STORAGE

Will New York achieve 6 gigawatts of energy storage by 2030? Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts of energy storage by 2030, which represents at least 20 percent of the peak electricity load of New York State.

What is New York state's energy storage goal? This Order formally expands the State's goal to 6,000 Megawatts of energy storage to be installed by 2030, and authorized funds for NYSERDA to support 200 Megawatts of new residential-scale solar, 1,500 Megawatts of new commercial and community-scale energy storage, and 3,000 Megawatts of new large-scale storage.

What does Ace NY say about energy storage in New York? Alliance for Clean Energy Director of Membership Services & Policy Analyst New York Kyle Rabin said, "ACE NY applauds Governor Hochul, the New York State Public Service Commission, and NYSERDA on this important step to achieving a greater deployment of energy storage across the state."

What is New York's energy storage roadmap? The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

How will energy storage impact New York? As New York continues to invest and build a cleaner grid, energy storage will allow us to use existing resources more efficiently and phase out the dirtiest power plants. This transition will help New York meet its greenhouse gas emission reduction goals, improve public health, and mitigate the future impacts of climate change.

NEW YORK ENERGY STORAGE

Are energy storage systems regulated in New York? Energy storage technologies and systems are regulated at the federal, state, and local levels, and must undergo rigorous safety testing to be authorized for installation in New York. You can download NYSED's New York State [PDF] and New York City [PDF] factsheets to learn more about energy storage regulations and safety in your community.

New Energy New York will help the U.S. meet the demand for domestic battery products by accelerating the battery development and manufacturing ecosystem in the Central, Southern Tier, Finger Lakes, and Western regions of Upstate.

New York's ambitious energy storage goals provide incentives and opportunities for developers. To meet the ambitious goal of 6 GW, the New York State Energy Research and Development Authority (NYSED), in

From grid storage to automotive power to aerospace and outer space, the facility is designed to support a variety of different battery cell formats and chemistries. Paul Malliband, Executive

The Northern New York Energy Storage Project is strategically located in a region that generates more than 80 percent of its electricity supply from renewable resources, including the Power Authority's St. Lawrence
