

NEXTERA ENERGY ANDORRA

Will NextEra Energy raise \$1.5 billion? Utility firm NextEra Energy said on Monday it intends to raise \$1.5 billion through the sale of equity units to fund new projects.

Who is NextEra Energy? NextEra Energy has been an industry leader in conserving the environment for many decades, and we continue to demonstrate that dedication across our enterprise. We began our clean energy journey in the 1980s when we invested in our first solar and wind projects. Today, we are shaping the future of energy through innovation and investments.

How has NextEra Energy changed over the years? From servicing 76,000 customers to now providing clean, affordable, reliable electricity to more than 12 million people, our business has undergone a remarkable evolution. Since our humble beginnings nearly a century ago, NextEra Energy has been pioneering new technologies, each marking crucial achievements.

Will NextEra buy Gulf Power Company? In May 2018, NextEra Energy announced that it planned to buy Gulf Power Company, the largest electricity producer in Northwest Florida, from Southern Company in a \$6.4 billion deal, pending approval from regulators.

What happened to NextEra Energy & Entergy? The acquisition, which expanded NextEra Energy's combined residential customer base in Florida to approximately 51 percent of the state's population and also included Florida City Gas, was completed on January 1, 2019. In 2018, NextEra Energy and Entergy left the Nuclear Energy Institute.

NextEra Energy General Information Description. NextEra Energy's
 regulated utility, Florida Power & Light, is the largest rate-regulated utility
 in Florida. The utility distributes power to nearly 6 million customer
 accounts in Florida and owns 34 gigawatts of generation.

NextEra Energy has been a strong performer in the 2024 stock market.
 The company's potential recommissioning of an Iowa nuclear plant would
 be a boost as data centers look for more power. The company's other
 renewable assets also stand to benefit as energy demand growth is
 expected to rise faster than in the past decade.
