

NORTH MACEDONIA ENERGY INDEPENDENCE SOLAR

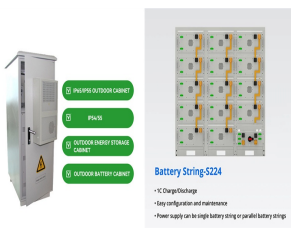

Who built the first solar plant in North Macedonia? The 10MW solar plant, built on the site of the spent Oslomej lignite coal mine, was constructed by the public company JSC Elektrani na Severna Makedonija (ESM). This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation.

How will a new solar plant help Macedonia? Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices."

How much solar power does North Macedonia have? Solar power Built on a former lignite open pit mining site, North Macedonia's Oslomej solar park will have an installed capacity of 120 MW when fully completed. (C) Ciril Jazbec

Should North Macedonia accelerate the transition to renewables? Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

Who produces electricity in North Macedonia? The main entity in North Macedonia for electricity production is a state owned company Elektrani na Makedonija (ELEM), with ~70% of the total installed capacity. ELEM is the owner of the two large coal fired thermal power plants, Bitola and Oslomej.
