These requirements also do not cover: performance during exposure to fire, structural attachments for the rack mounting system, structural performance of roof attachments for above roof mounting of photovoltaic (PV) modules and panels, and the mechanical and structural requirements of the IBC or IRC.

In some coastal areas, because of the frequent hurricanes, the strength requirements for photovoltaic brackets are very strict, which requires PV bracket manufacturers to be able to design a sufficiently strong solar bracket system. However, the increase in strength is always accompanied by an increase in cost.
