

PALESTINE STORES ELECTRICITY

Who supplies Palestinian electricity? The Israel Electric Corporation (IEC) supplies most of the electricity in the Palestinian territories. PETL is the sole buyer of imported electricity for distribution in West Bank Areas A and B and in the Gaza Strip, which in turn supplies the electricity to the six Palestinian distribution companies.

Is the energy sector in Palestine a unique situation? The energy sector, specifically electricity in the State of Palestine, is in a unique situation.

How much electricity does Palestine use? Electricity supply and demand According to the Palestinian Central Bureau of Statistics (PCBS), the total electrical energy consumption in Palestine in 2019 was reported to be 5,929.5 GWh. This quantity is almost entirely imported from outside sources, mainly from the Israel Electric Corporation (IEC), as shown in Table 1.

Where does Palestinian electricity come from? Palestinians are heavily dependent on imported electricity from the Israeli networks: 87 percent of electricity consumed is secured from Israel and around 4 percent from Egypt and Jordan. The remaining 9 percent is produced locally in Gaza and used to fuel the region's power plant on a continuous basis.

How much do Palestinians spend on energy? On average, households spend nearly 34 percent of their income on food and around 8.5 percent on energy (electricity and liquid gas). This reflects the vulnerability of Palestinians, especially the poor and marginal segments, and limits their ability to obtain the energy they need for daily use.
