

PALLET HYDRAULIC CLAMP ACCUMULATOR

Rubber cushioning to reduce vibration and noise Compensation for thermal expansion and contraction Exclusively designed for all types of accumulators, cylinders and filter housings Clear Zinc plated to resist corrosion Single Bolt ???

The clamp can well absorb the vibration of the hydraulic accumulator during operation and prevent it from falling off. It has the characteristic of compact structure, flexible connection and ???

Piston-type, inert gas precharged accumulators compensate for pallet pressure changes during machining. G 1/4 Threads. Hydraulic fluid compresses the precharged inert gas across the piston during circuit pressurization.

Highly rigid pallet clamp and repeatability of 3? 1/4 m with dual surface contact. Compact and reliable. High repeatability and retention of accuracy. Taper angle that withstands large cutting thrust force. Specialized design reduces surface ???
