The three-letter country code for Cabo Verde is CPV. This code is part of the ISO 3166-1 alpha-3 standard, maintained by the International Organization for Standardization (ISO). The ISO 3166-1 standard defines codes for the names of countries, dependent territories, and special areas of geographical interest. CPV in Solar Energy

The photovoltaic cells are placed in a piece of equipment, called solar stringer, that interconnects the cells in a series by soldering a coated copper wire, called ribbon, on the bus bar of the cell. This delicate operation creates the string that is the basic element that creates the electrical series in the photovoltaic module.
