There are two ways to combine photovoltaic arrays and buildings: roof installation and side elevation installation. These two installation methods can cover the photovoltaic array installation forms of most buildings. PV array roof installation forms mainly include a horizontal roof, inclined roof, and photovoltaic lighting roof. among them: 1.

Through the unique bracket waterproof diversion design, conventional photovoltaic components replace or cover roof building materials. This photovoltaic roof installation method is called BIPV waterproof bracket solution. If it directly replaces the roof color steel tiles, it is necessary to lay an additional insulation and fireproof layer.
