

PORTABLE ENERGY STORAGE CAPACITOR SPOT WELDING MACHINE

What is a glitter battery spot welder? The newly designed GLITTER battery spot welder is equipped with two super capacitors for energy storage and power supply for pulse welding. Compared to a traditional AC spot welder, it does not interfere with the electric circuit, which means no more tripping problems.

What is a super energy gathered pulse welder? The machine's super energy-gathered pulse technology combines with a max welding power of 19.8 KW to provide a reliable welding effect. The welder's small size and light weight make it more portable compared to a bulky traditional spot welder. The aluminum alloy housing also provides a more powerful and reliable machine.

What is a glitter 801h battery spot welder? The newly designed Glitter 801H battery spot welder combines the millisecond pulse welding technology and the latest capacitor energy-storage patent, bringing you a brand-new powerful and reliable spot welding machine.

How much power does a pulse welding machine use? The low power consumption technology enables you to use the machine efficiently for 12 hours with no heating problems. The pulse welding power can be seen on the LED screen and set via two adjusting buttons (0-99 range). 0.45mm nickel plated and 0.4mm pure nickel can be easily welded with the 420 Jmax energy.
