Kosovo A Power Station is a lignite power station with five units at Obiliq, Kosovo is the second largest power station in Kosovo with capacity of 650 MW after Kosovo B Power Station is described as the worst single-point source of pollution in Europe. [1] Despite plans to shut the plan down in 2017, [1] it was still partially operating as of September 2022.

Kosovo: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic. Nuclear power ??? alongside renewables ??? is a low-carbon source of electricity
