

What type of energy is used in Serbia? Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

What is Serbia's energy investment plan? The Ministry of Mining and Energy has announced a ???15 billioninvestment plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:

Who produces electricity in Serbia? The main producer of electricity in Serbia is Elektroprivreda Srbije. The company has an installed capacity of 7,662 MW and generates 38.9 TWh of electricity per year.

What should Serbia do with the electricity integration package? Serbia should focus on the transposition and imple-mentation of the Electricity Integration Package as a precondi-tion for the coupling of its short-term markets. Serbia should certify the gas transmission and storage operators, grant third party access at the interconnection points, and remove any other obstacles to new market entrants.

What is the legal setup of the Energy Agency of Serbia? The legal setup governing the Energy Agency of the Republic of Serbia (AERS) is largely in line with the Energy Community legislation. However, the autonomy of the management related to internal organization and the use of the annual budget is limited by the requirement of the Parliament to adopt statutes and hire additional staff.

How many MW of electricity does Serbia have? Installed capacity of hydro power is 2,835 MWand as of December 2019 wind power capacity is 500 MW. Serbia also makes use of geothermal and solar energy, currently 27% of Serbia's electricity comes from hydro while 4% comes from other renewables. Additional 600 MW of wind capacity is planned by 2030.
