The P250i Solid Oxide Fuel Cells (SOFC) are designed to work with new or existing power infrastructure including the utility grid, batteries, solar charge controllers, dc-dc converters, etc. Powered by readily available and low cost propane or natural gas, the P250i has the ability to sit in standby mode for months to years at a time monitoring battery voltage.

Fuel cells are essential for power generation across various critical infrastructure markets. Solid Oxide Fuel Cells (250W), powered by propane or natural gas, are ideal for delivering extended-run backup power, efficiently charging 12/24/48 VDC battery banks and ensuring critical loads remain powered.
