Does St Lucia offer incentives for solar PV installations? The government of St. Lucia recognizes the importance of transitioning to renewable energy sources and often provides incentives to encourage solar PV installations. These incentives may include tax credits, rebates, or favorable financing options.

Where is St Lucia's first solar PV plant located? On the 11th April 2018, the St. Lucia Electricity Services Limited (LUCELEC) ??? the sole electric utility company on the island ??? completed the commissioning of the island's first utility-scale solar PV plant. The plant is rated at 3 megawatt (MW) and is located in La Tourney, Vieux Fort, just north of the Hewanorra International Airport.

Does St Lucia have a power outage? St. Lucia, like many tropical regions, occasionally experiences power outages due to storms or other unforeseen circumstances. Solar PV installations, equipped with energy storage solutions such as batteries, provide a reliable source of power even during grid interruptions.

Renewable Energy is also known as "green power" or "clean energy", because it doesn't harm the environment and it is made from resources that Mother Nature will replace, these sources include Solar energy (which comes from the sun and can be turned into electricity and heat), Wind energy, Geothermal energy (from inside the earth), Biomass from plants, and Hydropower from ???

The National Energy Policy outlines the best energy practices for St. Lucia as the country attempts to become more energy secure. This energy security goal was outlined to include renewable energy from indigenous sources and diversify sources of petroleum. 2017 Saint Lucia National Energy Transition Strategy and Integrated Resource Plan [29]

SunTerra is transforming solar energy beyond intermittent and disruptive making it useable, available, and dispatched when electricity customers need it most. St Lucia has a high solar potential and set a renewable energy mix target of 35% by 2020. Presently St Lucia energy mix is comprised of just 1% renewable energy on the public grid.
