

# SALES OF ENERGY STORAGE PRODUCTS ABROAD

Which countries are promoting energy storage? Japan's federal and local governments announced annual subsidy programs for utility-scale batteries, while South Korea set a 25GW/127GWh storage target by 2036. India is taking steps to promote energy storage by providing funding for 4GWh of grid-scale batteries in its 2023-2024 annual expenditure budget.

What will energy storage be like in 2024? In 2024, the global energy storage is set to add more than 100 gigawatt-hours of capacity for the first time. The uptick will be largely driven by the growth in China, which will once again be the largest energy storage market globally.

Which country has the most energy storage capacity? The Americas region represents 21% of annual energy storage capacity on a gigawatt basis by 2030. The US is by far the largest market, led by a pipeline of large-scale projects in California, the Southwest and Texas. The US has also seen a wave of project delays due to rising battery costs.

How is India promoting energy storage? India is taking steps to promote energy storage by providing funding for 4GWh of grid-scale batteries in its 2023-2024 annual expenditure budget. BloombergNEF increased its cumulative deployment for APAC by 42% in gigawatt terms to 39GW/105GWh in 2030.

What drives energy storage investment? Much of the growth in energy storage investment is being driven by mandates and targeted subsidies, ranging from solar and wind co-location mandates in China, to the Inflation Reduction Act and state-level policies in the US. New support schemes are also emerging across Europe, Australia, Japan, South Korea, and Latin America.
