About Us Zayel Solar is a solar equipment supplier based in Riyadh, Saudi Arabia. Founded by highly experienced professionals in the field of solar energy. We supply complete turnkey solar solutions and systems in the whole kingdom with highest technical support and after sales service. As an integrated solar project supplier, we work towards aligning demand

Saudi Arabia's time to shine in solar energy use . While the abundance of sunshine means that solar panels can be generating high yields of electricity, the harsh conditions contribute to degradation of photovoltaic panels. Under its Vision 2030 initiative, Saudi Arabia aims to deliver 50 percent of its electricity from renewables by 2030

RIYADH: Saudi Arabia's Tadawul All Share Index closed in red on Thursday, losing 68.61 points, or 0.57 percent, to settle at 11,892.44. The total trading turnover of the benchmark index was SR10

Rather than solely an environmental solution, renewable energy is viewed by the Saudi government foremost as a prestigious business opportunity as the country seeks to becoming the world's lowest cost producer of renewable energy. Saudi Arabia already boasts among the world's lowest solar-power tariffs.

Saudi Arabia, the epicenter of global oil industry, has been showing keen interest in solar energy in recent years. Saudi Arabia has one of the world's highest solar irradiation in the world, estimated at approximately 2,200 a/h.

The Saudi Arabia solar energy market is rapidly gaining momentum, driven by the country's ambitious Saudi Vision 2030 plan that aims to diversify the economy beyond oil. With extreme solar radiation available throughout the year, Saudi Arabia is strategically positioned to become a leader in solar power in the Middle East.

Saudi Arabia, although PV at utility scale is a cost-efficient alternative. An intermediate business model that takes simultaneous advantage of the proximity to the final consumer, economies of scale and is managed professionally, might be economically competitive.

Saudi Arabia is the largest consumer of petroleum in the Middle East, with domestic consumption reaching 4 million barrels per day in 2012 out of daily production of 10 million barrels. Saudi Arabia's primary energy consumption is approximately 10 million barrels per day.

Solar panel in Jeddah. Solar panels, also known as photovoltaic (PV) panels, are cutting-edge devices designed to harness the limitless power of the sun and convert it into clean, renewable electricity. These innovative devices have revolutionized the way we generate energy, offering an
