How to save home assistant backups on Nas? To be able to save our Home Assistant backups on our NAS, we must first mount the corresponding directory in our Home Assistant. This can be done under ???Settings??? -> ???System??? -> ???Storage??? -> ???Add Network Storage??? Fill out the form and click on Connect. To have the backup created automatically, we create an automation.

What backup options are available for home assistant? Regular backups are crucial to protect your configuration, automations and integrations from data loss. This article introduces various backup options for Home Assistant, including the use of network-attached storage (NAS), the Google Drive backup plugin and virtual machine (VM) backup when Home Assistant is virtualized as a VM.

Where should a home assistant backup be located? Of course, the backup location must be placed on the NAS mount that has just been created. A very popular method for Home Assistant backups is the Google Drive Backup plugin. This add-on automatically synchronizes your Home Assistant backups with your Google Drive account. It offers a simple and reliable solution for backing up your data off-site.

Should I store backups outside of home assistant? Storing backups outside of Home Assistant makes sure they don't use space on Home Assistant to begin with. It also makes sure you can restore Home Assistant from backup in case you have an issue with your current installation.

Does home assistant support network mounted storage? As of Home Assistant Core 2023.6, Network Mounted Storage is supported for addons. Keeping the current data is optional, but the data will need to be moved regardless so the share can be created successfully. As of Home Assistant Core 2023.6, Network Mounted Storage is supported for addons.

How do I expand my home assistant storage? When you are running Home Assistant Operating System, you can use the following options to expand your storage: Replace your current storage medium, for example, the SD card, with a bigger one. Use a backup to restore Home Assistant from backup on the new SD card.

Developers recommend a class 10 sd card with 32 GB of storage but I only have a old 16GB sd card from my phone . Does anyone run out of storage with 16Gb? Home Assistant Community Is 16GB of storage enough to run HA? Installation. BlackBerry\_pi (Zing) February 24, 2018, 12:24pm 1. Hey everyone, is 16 GB of storage enough ? Developers

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I hit "reload" the message disappears. Anyone experienced something similar?

I've been using Home Assistant for some months now. And I'm looking into good ways to store sensor data long-term. I think it would be interesting to be able to track how temperature varied from month to month and year to year, see how it correlates to power consumption, indoor temperature etc. I'm currently using a MariaDB database for storing ???

Hi, it seems that my storage is almost full. I did had some messages in my Unifi controller (running as add-on on hassio) and a system metric shows that 97.7% is now full of disk: What can I do to check and free up disk space again? Home Assistant Community Disk almost full. Installation. Home Assistant OS. WTFoX74 (Martin) June 10, 2019, 2

Advantages: Central storage space: NAS solutions such as Synology or QNAP make it possible to store backups in a central location. Automated backups: Home Assistant can be configured so that backups are regularly transferred to the NAS. Redundancy: Many NAS systems offer RAID configurations that provide additional data security through redundancy. ???

Ok I tentatively have something working with a VM running HassOS to represent the Home Assistant Green and here was my process in case anyone is curious:.. Created a USB for udev loading based on the thread located here: [SOLVED] Mount USB drive in Hassio to be used on the Media Folder with udev customization Formatted the external drive ???

Hello. I run Home Assistant on a Home Assistant Blue. Today, I noticed that the storage space on 128GB is full. On January 1, 2024, the storage was 22% full, so something has escalated recently. I have removed all backups stored on Home Assistant, keeping them on Google Drive. The latest snapshot is 14GB, much larger than previous ones. In the Backup ???

By default the .storage folder is hidden in the File Editor, but it can be revealed that's it! your .storage will now show up in your file editor! Making an inkplate dashboard with home assistant; Recent Comments. Claire on Updating / Upgrading the magimix cook expert firmware from 2.01S to 4.00F (new features!) only available on the french

QuestDB state storage (QSS) custom component for Home Assistant Repository: CM000n/qss: QuestDB State Storage (QSS) Custom Component for Home Assistant to store entity states inside a QuestDB. (github ) QSS makes it possible to transfer state information of the Home Assistant entities simply and efficiently via InfluxDB Line Protocol into ???

Netzwerkspeicher oder in englisch abgekürzt NAS für Network Attached Storage, kann seit dem Home Assistant Release 2023.6 eingebunden werden. Damit ist es möglich Backups ohne Umwege über Add-Ons auszulagern. Desweiteren kann auf Medien des NAS zugegriffen und zum Beispiel Musik direkt abgespielt werden. Zu guter Letzt können ???

By default, Home Assistant records everything in the database. If you don't need that much history, then don't record it. (See Recorder Integration). Also, if you don't need the history, you can safely delete the database (home-assistant\_v2.db). Home Assistant will start a new one and when it fills up your storage, you can delete it again.

I'm running HA on windows 11 virtual box. I used 900G hdd storage because my frigate videos & photos take space very much and very fast even though I write only 1 day retain in frigate.yml. Right now, I notice frigate cameras don't show in front-end. I think my HA run out of storage. I check my storage but HA didn't allow me to show the

For the Operating System, you'll find Home Assistant under Other specific-purpose OS -> Home assistants and home automation -> Home Assistant. Finally, select the NVMe drive as the storage and write the OS. Once the Home Assistant OS is written we need to reconfigure the

I was hoping someone can help me figure out how I can record footage from a Tapo camera to a storage server on my network. I am using the Tapo control integration and so far it works well. I am now trying to set up an automation that when the camera senses motion it will start recording for 60 seconds. I am however struggling the with the file name (which ???

So, firstly, I've been trying to follow the guide from Frigate's documentation here: [Home Assistant network storage | Frigate](#) I've created my NAS called frigate and I've created a file called test with the text "blah bl??? So, firstly, I've been trying to follow the guide from Frigate's documentation here: [Home Assistant network](#)

Can someone give me detailed instructions on accessing the hidden files in ".storage" ? I just got a brand new HA Blue and in the process of getting it going I somehow have the wrong username and password. Instructions under Authentication - Home Assistant mention deleting some files from .storage but nobody gives details on how to do it. Unfortunately SSH is ???

Not sure whether this is the best location for this??? I recently got a Home Assistant Green as a starter into HA. I've been running it for about 2 weeks now, and I notice that my storage is already showing around 38% full (think it was in the teens when I first set it up). I have added a handful of add-ons, integrations, etc. Is there any way to see where that space is ???

Hi, this Add-on connects to Fenecon's interface using websocket protocol and uses HA's MQTT broker to publish a device and sensor entities to Homeassistant. You can configure all Fenecon(OpenEMS/FEMS) channels and a couple of more things using the container configuration. Maybe someone find it usefull. Yes, it's my first Add-On and I'm not a ???

Do you have any examples of /config/.storage (catalogs folders) Needs the fold for JS, and PNG, JPG, also i??? Hi, i wonder when you have HA Hassio in storage mode which folders should you have in "config / ???

The Frigate integration can be easily installed via HACS (Home Assistant Community Store). Follow these steps: Navigate to HACS in Home Assistant: Go to Home Assistant > HACS > Integrations. Click on Explore & Add Integrations and search for Frigate. After installation, restart Home Assistant to apply the changes. Configure the integration:

When you restart home assistant as the last part of step #6, frigate should now be storing media (recordings, clips, snapshots) on your external drive. You can check this by looking at the drive ???

Hi, I have a couple of questions I'm hoping someone can help with??? I have a Home Assistant Green, and I would like to know if there is a way to increase the storage from 32GB. I found the settings to add external storage (NAS) to Backup, Media and Share (which I have done with an NFS share), but I don't have the ability to move my data disk to any of those ???

The main culprit of failed Home Assistant installs on a RPi: The SD Card. About 2 years ago, I wrote a widely popular article for Optimizing your Home Assistant Database in order to combat this to a degree, by filtering any entities you don't need recorded from the database. This process still holds value and is applicable even today, although things have gotten much ???
