

SERBIA NORTHVOLT LABS

What is Northvolt labs? Home to our battery R&D and cell development projects, Northvolt Labs is a campus of facilities to drive innovation in battery technologies. From materials science, battery R&D and cell manufacturing, to full validation facilities and customer meeting spaces, at Northvolt Labs we have it all in one place.

What can Northvolt labs do for You? At Northvolt Labs, the development of lithium-metal battery technology will be supported by access to a world-class team of material engineers, cell designers and manufacturing experts, working alongside cathode active material and cell manufacturing capabilities, as well as global supply chain development resources.

Where is Northvolt based? The group in 2017 announces plans to build \$4 billion lithium-ion battery gigafactory Northvolt Ett and research facility Northvolt Labs. It partners with BMW and truck maker Scania. It says in October 2018 it is developing a battery systems factory in Poland.

Why should Europe establish Northvolt labs? Find out how. Today's outlook on battery demand reinforces the rationale for establishing Northvolt Labs. For Europe to assure its leadership in traditional industries of automotive engineering, and moreover to take a lead on sustainable energy technologies, securing domestic Li-ion battery manufacturing competences is key.

Where is Northvolt's next-generation lithium-metal battery based? Northvolt today announced the decision to shift development of its next-generation lithium-metal battery technology from California to its R&D campus, Northvolt Labs, in Vasteras, Sweden.
