SKI will invest CNY 2.04 billion to acquire 49% equity of EVE Energy's subsidiary, Huizhou Eve United Energy. Belonging to the third-largest company group in South Korea, SK Group, SKI is a world-leading energy and chemical company. It is also known as one of three battery giants in South Korea (other with Samsung SDI and LG Chemical).

The $260 billion renewables industry needs storage so power companies can absorb surges from solar and wind farms from Texas to Mongolia. The devices will be key for plans by Germany to shift Europe's biggest electricity market from atomic energy, said Gil Forer, Ernst & Young LLP's clean-tech head in New York.

SK Innovation (SKI) officially split off its battery business into a wholly owned subsidiary named "SK On," in a bid to maximize growth and turn it into a global leading player, the company

Several companies are developing alternatives that involve dropping a heavy cylindrical weight into a big hole in the ground. Near the southern tip of Nevada, a company called Advanced Rail

Power for the electric solutions at Hammarbybacken is being supplied by a PU500 mobile battery energy storage system (BESS) with integrated charger provided by Volvo Energy. The power unit brings around 330-400kWh of capacity to sites in challenging locations - like ski resorts -

where access to the grid is weak or non-existent.
