## ACCUMULATOR INSTALLATION DIAGRAM

Can HYDAC accumulators be mounted directly inline? By using an appropriate adapter, HYDAC accumulators, up to size 1 l, can be mounted directly inline. 1 l, we recommend the use of HYDAC accumulator supports or the HYDAC accumulator mounting set. See tables based on nominal dimensions, this differs slightly from the nominal volume and must be used when calculating the effective volume. 1.

How do I attach a HYDAC charging and gauging unit? Attach appropriate HYDAC charging and gauging unit (type FPS for HYDAC gas valve version 4, type FPK for HYDAC gas valve version 1 and type FPK with adapter FPK/SB for top repairable bladder accumulators) to the accumulator by following the instructions in the HYDAC Charging and Gauging Units manual #02068202.

How can HYDAC calculate accumulator volumes? Taking the customer's own operating data into account, HYDAC can calculate the required accumulator volumes using the accumulator simulation program: z ASP ??? Accumulator Simulation Program. Please read the relevant operating instructions for the individual HYDAC components! 2. MODEL CODE 3. EXAMPLES OF ACCUMULATOR STATIONS 3.1.

How long does it take to charge a HYDAC accumulator? Once attached, slowly open the shut-off valve on the commercially available nitrogen bottle and allow the gas to slowly enter the accumulator. The first 20 to 25 PSI should take 2 to 3 minutes. If gas precharge pressure is too low, continue charging; refer to HYDAC Charging and Gauging Units manual #02068202.

What is a HYDAC system? 1. GENERAL In a back-up version with nitrogen bottles to increase the effective volume The HYDAC system approach creates a HYDAC system of, for example, bladder or piston accumulator stations, by integrating individual HYDAC components. The modular design of the accumulator stations enables HYDAC to

How do you precharge an accumulator? Precharging The Accumulator  
Precharge new or repaired accumulators with dry nitrogen gas to the proper gas precharge pressure (P<sub>0</sub>) prior to applying hydraulic system pressure. Remove valve protection and valve seal caps (where applicable).
