

SOLAR GENSETS FRENCH SOUTHERN TERRITORIES

Who builds Europe's largest floating solar farm in France? Q ENERGY, Ciel & Terre, Solutions30 and Perpetum Energystart the construction of Europe's largest floating solar farm in France.

Will France increase its solar power capacity by 2023? France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW.

Who is Ciel & Terre? Ciel & Terre aims to provide reliable solutions and services to deploy large floating solar power plants. To do so, the floating solar company is constantly optimizing its solutions and engineering support. Ciel & Terre's floating solar solutions are based on 13 years of field-proven technology and can accommodate large photovoltaic panels.

How big is residential solar PV in France? The average size of residential solar PV systems is estimated to be 3.24 kW moving to 2030. The technical potential for residential solar PV in France is estimated at 34,810 MW. The payback time for residential Solar PV in France is 25.1 years as of 2015.

Is France a good country for solar power? In 2016, France was ranked 4th in the EU by installed capacity and 14th in terms of PV capacity by inhabitant at 107.3 Wp/Inhab compared to the EU average of 197.8 Wp/Inhab for the year. The country's largest completed solar park to date was the 300 MW Cestas Solar Park.
