In May 2002 Clay Energy commissioned the first off-grid solar base station power system for Vodafone Fiji, which led to the rollout of these power systems to six mobile operators in the region. Clay Energy's first PV grid-connect system (18kW) was installed and commissioned in 2008,

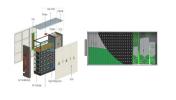

being the first in the region.

Solar energy provides businesses in Fiji with more predictable and stable energy costs compared to traditional fossil fuels, which are subject to price fluctuations and geopolitical uncertainties. By generating their own electricity from solar power, businesses can hedge against future energy price increases.

The most recent statistics concerning Fiji's solar market reveal that the country has an installed solar capacity of 4 Megawatts. This meager solar capacity is a course for concern primarily because its solar potential is approximately 170 Gigawatt-hours annually. However, the government's newfound desire to exploit the nation's renewable

ULTRA-BRIGHT GRID-LIKE POWER AT AN AFFORDABLE PRICE: THE HIGHEST PERFORMING SOLAR LIGHTING AND ENERGY HUB FOR OFF-GRID HOMES AND BUSINESSES With three, 200 lumen high-power fixed room lights and a massive 12,000 mAh battery, the Home 120 delivers abundant lighting and appliance charging for the most ???

The most recent statistics concerning Fiji's solar market reveal that the country has an installed solar capacity of 4 Megawatts. This meager solar capacity is a course for concern primarily because its solar potential is approximately 170 Gigawatt-hours annually. In the current scenario, for example, commercial prices for solar have

Solar photovoltaic (solar PV) systems are gaining popularity globally and likewise for Fiji. Globally, the price of solar PV has dramatically decreased over the last decade, resulting in an increase in new solar PV installation for electricity generation. Fiji's solar PV generation on grid was nil before 2010.
