Will Guyana deploy 8 PV plants linked to storage? The Guyanese authorities are seeking proposals to deploy eight PV plants linked to storage. The government of Guyana and the Inter-American Development Bank (IDB) have jointly launched a tender to deploy 33 MW/34 MWh of solar-plus-storage capacity. The Guyanese authorities said the tender will be divided into three lots.

Where is Guyana's second mega-scale solar farm located? The Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage.

How many solar homes are distributed in Guyana? The GEA supported the implementation of a massive electrification project to supply, deliver, and distribute 30,000 solar home energy systems to hinterland and riverine communities in Guyana. A total of 26,398 units were distributed as of December 2023.

How much solar power does Guyana have in 2021? According to the International Renewable Energy Agency (IRENA), Guyana had an installed PV capacity of around 8 MW by the end of 2021. The country's ambitious Low-Carbon Development Strategy aims to meet all power demand from renewables by 2025 and will require the replacement of 200 MW of thermal power generation capacity.

How many solar panels were installed in 2023? In 2023, the solar PV installed capacity increased by 6.661 megawatts to 14.62 megawatts with the additions that include the 1.5 megawatts Bartica solar PV farm, completion of 21 solar mini-grids, 22 solar PV systems at public buildings, and distribution of 26,398 solar home energy systems.
