Why is solar power growing in Hungary? Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2022 Hungary had just over 4,000 megawatt (MW) of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010.
