Who owns SolarCity? The company was founded on July 4, 2006, by Peter and Lyndon Rive, the cousins of SpaceX and Tesla CEO Elon Musk. Tesla acquired SolarCity in 2016, at a cost of approximately US\$2.6 billion (equivalent to \$3.3 billion in 2023) and reorganized its solar business into Tesla Energy.

How much solar power does SolarCity generate? By 2015, its installed panels were capable of generating 870 MW of solar power and accounted for approximately 28% of non-utility solar installations in the U.S. that year. In October 2014, SolarCity announced it would be offering up to \$200 million in solar bonds in its first registered public offering of bonds in the United States.

What is SolarCity & how does it work? SolarCity was involved in a collaboration with the program along with the Energy Department's National Renewable Energy Laboratory and Hawaiian Electric Industries. Using government and taxpayer funds, SolarCity helped 2,500 Hawaii residential customers connect their solar power systems to the grid by the end of December 2015.

Is SolarCity a good solar company? In 2013, SolarCity was the leading residential solar installer in the U.S. Solar Power World magazine listed it as the number two overall solar installation company in the U.S. In 2013, SolarCity purchased Paramount Solar from Paramount Equity for \$120 million.

How much debt does SolarCity have? The business model became the most popular in the US and made the company the largest residential solar installer, but it caused SolarCity to have over \$1.5 billion in debt by the time of its acquisition in 2016 (equivalent to \$1.9 billion in 2023).
